Good afternoon Meredith,

I am sending you this email after our telephone conversation regarding the adverse event you experienced following your Covid 19 immunization.

The AEFI report was received on the 5th of May 2022, reviewed by the MOH, completed and filed with Public Health Ontario on the 9th of May 2022.

According to the Provincial Case Definition for determining the Adverse Event Following immunization this investigation was submitted as "Other Severe OR Unusual Events", which is a category reserved for reports of events with a "temporal association to immunization, for which there is no known cause, and which are not covered under the categories previously described."

No recommendation was made by the MOH as the vaccine series was complete and client had already followed up with specialist referrals made by family physician at that time.

Take care,

Shawna Wilson RN
